

Tungsten TRYCON Basic Invest HAIG

The fund's objective is to provide absolute returns with a moderate risk-return profile and low correlation to equity markets and other investments.

Tungsten TRYCON Basic Invest HAIG is a purely systematic, UCITS-compliant CTA fund with daily liquidity. The fund seeks to achieve its objective predominantly through the implementation of the proprietary QuantMatrix models. The strategy trades some 50 global equity, bond, interest rate and currency markets, using regulated, liquid and exchange traded financial instruments. Both long and short positions can be held seeking to profit from identified trading opportunities. The strategy and its strict risk management are based on a clearly defined set of rules, adjusting the portfolio dynamically to changing market conditions.

Monthly comment

While the strategy could identify hardly any profitable opportunities in the equity markets in the first half of the month, subsequent gains from short positions in the Hang Seng and EuroStoxx50 could at least offset some of the losses previously suffered from long positions particularly in the Nikkei and in the CAC-40. In the bond markets, the strategy was profitable in US bonds (30, 10 and 5 years) and the Bund future, taking advantage of periods of both rising and falling prices. Moderate losses in the sector were incurred only in Italian bonds. In the second half of the reporting month, profits were achieved in most traded currency pairs, particularly as both the Euro and the British pound depreciated against the US dollar. Noticeable losses in currencies were recorded only in JPY/USD.

Risk allocation by sector per month end

Risk allocation is based on a proprietary measure. The information is intended to give an indication of the portfolio's allocation. A large cash level is inherent to the strategy, average margin allocation is 5%-10%.

Performance attribution by sector

The sector performance attribution is intended to be indicative and to give an estimate of winning and losing components of the derivative positions in the fund. The results do not include fees/expenses or contributions from the cash/bond portfolio and do not add up to the aggregate fund performance.
