

Tungsten ZENTURIO UI

Monthly Comment

MARGIN CALL - It seemed to be a quiet month, but suddenly fear took hold in the market. Concerted day traders tried to trigger a giant short squeeze in stocks where various hedge funds had massive short positions. The small investor storm triggered several Value at Risk events that forced hedge funds to reduce their long/short positions. In the end, the magnitude was so high that it even affected the broad equity market and volatilities increased worldwide. ZENTURIO was able to benefit from this scenario and ended the month with a pleasing gain of 1%.

Fund description

Tungsten ZENTURIO UI is a global convexity fund designed with the aim of providing a return stream with diversification and low correlation to broad based markets. Over the long run the return objective is Euribor plus 3 to 5% across the full business cycle.

The approach of the Tungsten ZENTURIO UI is based on the view, that there are inefficiencies in the pricing of implied vs. historical volatility. The Fund deploys a combination of multi-leg option positions with the capability to profit from volatility regime changes in both, high and low volatility environments. ZENTURIO utilizes exchange traded securities on equity and bond indices and single stocks, with an emphasis on an asymmetric risk reward profile, with liquidity and defined risk.

ESG rating distribution

Intended product classification according to SFDR: Article 8

- Consideration of ESG & sustainability criteria in the investment strategy
- Scope of the taxonomy regulation
- Exclusion criteria are applied

Quarterly performance attribution

Frequency distribution of MoM returns

Drawdown analysis
