

Tungsten PARITON UI

Monthly Comment

SURPRISE – With US in a recession, inflation at a 40 year high, the Ukraine war entering into the next phase, Germany running out of gas, political turmoil in UK and Italy, Chinese borrowers refusing to pay their mortgages and central banks worldwide in tightening mode, would you guess financial markets would fly? Nasdaq up 12%, 30 Year Bunds up 13% and Bitcoin up 27%, just to mention a few markets. Investors are trapped between the bad environment and the relentless loss of value from H1. How can you be seriously and prudently positive now and buy this market? Almost any comment we read call this a bull trap, a bear market rally or technical reaction at best. But in history the news did never look good one month after the market lows. Your three options here are: (1) Stay out until markets are less choppy, (2) buy what you think you understand, and buy options to hedge tail risk (3) give it a chance and diversify as wide as possible. You know, what we stand for. July was PARITONs best month in almost 9 years.

Fund description

The Tungsten PARITON UI strategy aims to achieve a stable absolute return by combining several different asset classes in a multi asset portfolio.

The Tungsten PARITON UI fund considers only those assets that deliver an attractive risk/return ratio. To avoid a one-sided allocation, weights to these assets are assigned using a special risk balancing method. The employment of such risk balancing promises high risk-adjusted returns (Sharpe ratios) as the aggregate portfolio risk is managed very effectively. Due to the low risk nature of certain asset classes the fund may employ leverage in order to achieve a relatively constant level of volatility. The expected return of the strategy is 3%-6% p.a. above Euribor (1m).

MSCI ESG Rating and Distribution

Product classification according to SFDR: Article 8

- Consideration of ESG & sustainability criteria in the investment strategy
- Scope of the taxonomy regulation
- Exclusion criteria are applied
