

## Tungsten PARITON UI

### Monthly Comment

OKTOBERFEST - The Dow Jones (+14%) recorded its best month since 1976, despite 10y US Treasuries recorded the longest daily consecutive increase in yields since 1984. In fact, this current melt-up is the equity market's 5th attempt this year to stage a 10%+ rebound. Which means for any Short investor he has to survive a cumulative 50-60% short squeeze. These markets are not easy for anyone. Diversified investors had a mediocre up month. Global Bonds fell further as yields are still rising and the central banks U-turn in the money policy implied in Forward Rates regularly gets repriced in a later month and in a longer lasting terminal rate. But it is less important for markets, when the U-turn finally comes, but at which rate level the hiking comes to an end. With every week the inflation is stable in the high single digits the Forward yields will rise higher and weigh on equity markets.

### Fund description

The Tungsten PARITON UI strategy aims to achieve a stable absolute return by combining several different asset classes in a multi asset portfolio.

The Tungsten PARITON UI fund considers only those assets that deliver an attractive risk/return ratio. To avoid a one-sided allocation, weights to these assets are assigned using a special risk balancing method. The employment of such risk balancing promises high risk-adjusted returns (Sharpe ratios) as the aggregate portfolio risk is managed very effectively. Due to the low risk nature of certain asset classes the fund may employ leverage in order to achieve a relatively constant level of volatility. The expected return of the strategy is 3%-6% p.a. above Euribor (1m).
