

## Tungsten PARITON UI

### Monthly Comment

GOLDILOCKS – Just in time for the festive season markets decided in November to focus on what they wish for (FED Pivot), while shrugging off the things difficult to value (Geopolitics) and the things they don't like (Recession). Despite signs of economic slowdown, more military escalation in the Ukraine (and a missile in Poland) and the blow up of one of the biggest Ponzi schemes in history (FTX) equities and Bonds rallied in tandem. European stocks outperformed their US Peers, but the most stunning performance was in Asia, where Hang Seng Index jumped 25%. Yield curves flattened significantly into the biggest inversion since the 80's as short-term rates grind further up while longer term rates continued their fall from October highs. Focus for the last month will be on the FED (50bp hike) and in Europe on the weather as arctic freeze will be expensive in Germany and a horror in Ukraine.

1) The inception date of the retail share class is 06 October 2014. The performance from 18 December 2013 until 02 June 2014 is the performance of the seeder share class adjusting the fee structure to reflect the differing costs of the retail share class versus the seeder share class. The performance since 06 October 2014 is the live performance of the retail share class. 2) Risk-free rate: Euribor (3m).

### Fund description

The Tungsten PARITON UI strategy aims to achieve a stable absolute return by combining several different asset classes in a multi asset portfolio.

The Tungsten PARITON UI fund considers only those assets that deliver an attractive risk/return ratio. To avoid a one-sided allocation, weights to these assets are assigned using a special risk balancing method. The employment of such risk balancing promises high risk-adjusted returns (Sharpe ratios) as the aggregate portfolio risk is managed very effectively. Due to the low risk nature of certain asset classes the fund may employ leverage in order to achieve a relatively constant level of volatility. The expected return of the strategy is 3%-6% p.a. above Euribor (1m).

### MSCI ESG Rating and Distribution

### Product classification according to SFDR: Article 8

- Consideration of ESG & sustainability criteria in the investment strategy
- Scope of the taxonomy regulation
- Exclusion criteria are applied
