

Tungsten PARITON UI

Monthly Comment

DÉJÀ VU – It's early June and we count already 25 new all time highs for the S&P500. The rally is based on both higher earnings and higher valuation multiples earnings, which sounds healthy. But at a deeper look Big Tech overshadows all gains. The enthusiasm about the AI revolution has led to the highest concentration ever in western stock markets. The Top3 Microsoft, Nvidia and Apple are making up over 20% of the S&P500 Index. No matter on which metric one compares this outperformance of one sector, it all remembers to the dot.com bubble, which sounds not healthy at all. The Bond market is the opposite picture, with the Bloomberg aggregate Bond Index still 17% below its 2020 peaks and already by far in its longest bear market ever. Very few things speak in favor of Bonds here, but a lot speaks for more caution on the equity side. Which again brings strategic hedging onto the table especially as very long-term equity insurance is on its cheapest levels in decades.

Fund description

The Tungsten PARITON UI strategy aims to achieve a stable absolute return by combining several different asset classes in a multi asset portfolio.

The Tungsten PARITON UI fund considers only those assets that deliver an attractive risk/return ratio. To avoid a one-sided allocation, weights to these assets are assigned using a special risk balancing method. The employment of such risk balancing promises high risk-adjusted returns (Sharpe ratios) as the aggregate portfolio risk is managed very effectively. Due to the low risk nature of certain asset classes the fund may employ leverage in order to achieve a relatively constant level of volatility. The expected return of the strategy is 3%-6% p.a. above Euribor (1m).

MSCI ESG Rating and Distribution
