

# Tungsten TRYCON AI Global Markets **Dynamic**

## Monthly Comment

At the start of the portfolio on May 16, 2024, the strategy encountered a weaker equity market in which it recorded net losses, mainly from long positions in the Dow Jones Industrial Average Index and the S&P 500 Index. These losses were cushioned by gains from short positions in the FTSE-100 Index and the Stoxx 600 Basic Resources Index. In contrast, the strategy was able to profitably exploit the weaker bond markets in the reporting period and made the strongest contribution here, driven primarily by short positions in Bunds and UK and US government bonds. In contrast, the strategy suffered losses from long positions in South Korean and Australian government bonds. Currencies delivered a neutral result. Although the portfolio benefited significantly from the falling JPY, it recorded losses in the EUR, CAD and MXN of comparable magnitude. In money market rates, the strategy benefited in particular from the correct anticipation of higher interest rates in the UK. Rising equity market volatility resulted in moderate losses for the portfolio, particularly from a short position in the VIX index.

For regulatory reasons, the historical performance as a chart can be shown no sooner than 12 months after launch.

## Fund description

The fund's objective is to provide absolute returns with a medium risk profile and low correlation to equity markets and other investments. The underlying trading models are based on Artificial Intelligence.

The Tungsten TRYCON AI Global Markets Dynamic pursues a systematic multi-asset long/short strategy. It uses quantitative models based on Artificial Intelligence to identify trading opportunities in the financial markets. Periodic re-learning leads to regular updates of the models. The investment universe comprises some 60 global equity, bond, interest rate and currency markets. In these markets, the fund can take both long and short positions using regulated, liquid and exchange-traded financial instruments. The portfolio is dynamically adjusted to changing market conditions in accordance with a strict risk management. The strategy is characterized by low correlation with traditional investments.

## Performance attribution by sector

The sector performance attribution is intended to be indicative and to give an estimate of winning and losing components of the derivative positions in the fund. The results do not include fees/expenses or contributions from the cash/bond portfolio and do not add up to the aggregate fund performance.

## Key markets

### Top 3 markets

- 1) JPY / USD
- 2) Euro Bund
- 3) 10Y Long Gilt

### Bottom 3 markets

- 1) DJIA Index
- 2) EUR / USD
- 3) VIX Index

(Key futures markets by contribution to performance)

## Risk allocation by sector per month end

For regulatory reasons, the drawdown analysis can be shown as a chart no sooner than 12 months after launch.

Risk allocation is based on a proprietary measure. The information is intended to give an indication of the portfolio's allocation. A large level of cash and short-term bonds is inherent to the strategy, the average margin allocation is 10%-20%. \* Cash = bank (term) deposits and short-term government bonds.
