## Monthly Comment

**POLITICS AND CONCENTRATION** – European equities underperformed US peers by a large margin, as political uncertainty built up in France after President Macron’s surprise election call. French stocks dropped 6% in a few days while Nasdaq added up 3%. US stock performance again mainly driven by Nvidia which added another 13% in June and it’s market cap meanwhile surpasses France’s and Britain’s GDP. There has been written a lot about the market concentration in the US equity market, which bottom line is higher than in the dot.com bubble. When we compare S&P equal weight Index with European peers the US outperformance shrinks down to less than a percent and both indices ended up slightly down in June. More political markets ahead with political change in UK, gridlock in France, paralysis in Germany and a US president who looks confused like Leslie Nielsen in The Naked Gun, but still thinks he can beat Trump.

### Fund description

The Tungsten PARITON UI strategy aims to achieve a stable absolute return by combining several different asset classes in a multi asset portfolio.

The Tungsten PARITON UI fund considers only those assets that deliver an attractive risk/return ratio. To avoid a one-sided allocation, weights to these assets are assigned using a special risk balancing method. The employment of such risk balancing promises high risk-adjusted returns (Sharpe ratios) as the aggregate portfolio risk is managed very effectively. Due to the low risk nature of certain asset classes the fund may employ leverage in order to achieve a relatively constant level of volatility. The expected return of the strategy is 3%-6% p.a. above Euribor (1m).

### MSCI ESG Rating and Distribution

### Product classification according to SFDR: Article 8

- Consideration of ESG & sustainability criteria in the investment strategy
- Scope of the taxonomy regulation
- Exclusion criteria are applied

### Quarterly performance attribution<sup>3)</sup>

### Correlation since 01/2014 (daily data)<sup>1)</sup>

### Drawdown analysis<sup>1)</sup>

### Frequency distribution of MoM returns<sup>1)</sup>
