

Tungsten PARITON UI

Monthly Comment

GREAT ROTATION – First things first: PARITON won 3,1% in July, best month so far this year and the 3rd consecutive positive month. We could profit from both equities and bonds, as both went up in tandem. But within the asset classes there were interesting things going on. Equities saw the biggest small cap outperformance vs. big tech in at least two decades. The rotation began after big tech’s relentless run upwards until mid-July, with a row of 6 record closes for the S&P500 Index, summing up to 37 all time highs this year. Meanwhile it looks different. The Nasdaq, after reaching its last all time high on July 10th, hovers just 17 trading days later in “correction territory” >10% lower and from Russell’s 10% outperformance is little left. In Bonds the steepening of the curves is continuing. The inversion of both the 10-2YR-US and Bund yield curve is back to less than 15bps from more than 80bps in2023.

Fund description

The Tungsten PARITON UI strategy aims to achieve a stable absolute return by combining several different asset classes in a multi asset portfolio.

The Tungsten PARITON UI fund considers only those assets that deliver an attractive risk/return ratio. To avoid a one-sided allocation, weights to these assets are assigned using a special risk balancing method. The employment of such risk balancing promises high risk-adjusted returns (Sharpe ratios) as the aggregate portfolio risk is managed very effectively. Due to the low risk nature of certain asset classes the fund may employ leverage in order to achieve a relatively constant level of volatility. The expected return of the strategy is 3%-6% p.a. above Euribor (1m).
