

Tungsten TRYCON AI Global Markets **Dynamic**

Monthly Comment

Although equity markets ended the year on a weaker note, the strategy was still able to identify lucrative trading opportunities in December. It was particularly profitable in the S&P 500 and Nasdaq 100, thanks to successful timing of long positions. In Europe, the strategy's best performance was in the DAX 40, while moderate losses were recorded mainly on long positions in the IBEX 30 and the DJIA. The contribution from bond futures was also positive, as the strategy benefited from falling prices in US bonds of various maturities, while losses from long positions in Canadian and South Korean government bonds reduced the sector result by a small margin. (Overall, the political turmoil in South Korea had no significant impact on the monthly result across the asset classes traded there). The best performing sector in December was currencies: The strategy took advantage of the strong US dollar, with short positions in CAD, AUD and JPY, while the only notable losses were incurred in GBP. Money market and volatility futures had no significant performance contribution in the reporting month.

Fund description

The fund's objective is to provide absolute returns with a medium risk profile and low correlation to equity markets and other investments. The underlying trading models are based on Artificial Intelligence.

The Tungsten TRYCON AI Global Markets Dynamic pursues a systematic multi-asset long/short strategy. It uses quantitative models based on Artificial Intelligence to identify trading opportunities in the financial markets. Periodic re-learning leads to regular updates of the models. The investment universe comprises some 60 global equity, bond, interest rate and currency markets. In these markets, the fund can take both long and short positions using regulated, liquid and exchange-traded financial instruments. The portfolio is dynamically adjusted to changing market conditions in accordance with a strict risk management. The strategy is characterized by low correlation with traditional investments.

Performance attribution by sector

The sector performance attribution is intended to be indicative and to give an estimate of winning and losing components of the derivative positions in the fund. The results do not include fees/expenses or contributions from the cash/bond portfolio and do not add up to the aggregate fund performance.

Key markets

Top 3 markets

- 1) JPY / USD
- 2) 10Y Treasury Notes
- 3) CAD / USD

Bottom 3 markets

- 1) 10Y Canadian Govt. Bonds
- 2) GBP / USD
- 3) 10Y Korean Govt. Bonds

(Key futures markets by contribution to performance)

Risk allocation by sector per month end

For regulatory reasons, the drawdown analysis can be shown as a chart no sooner than 12 months after launch.

Risk allocation is based on a proprietary measure. The information is intended to give an indication of the portfolio's allocation. A large level of cash and short-term bonds is inherent to the strategy, the average margin allocation is 10%-20%. * Cash = bank (term) deposits and short-term government bonds.
