

Tungsten PARITON UI

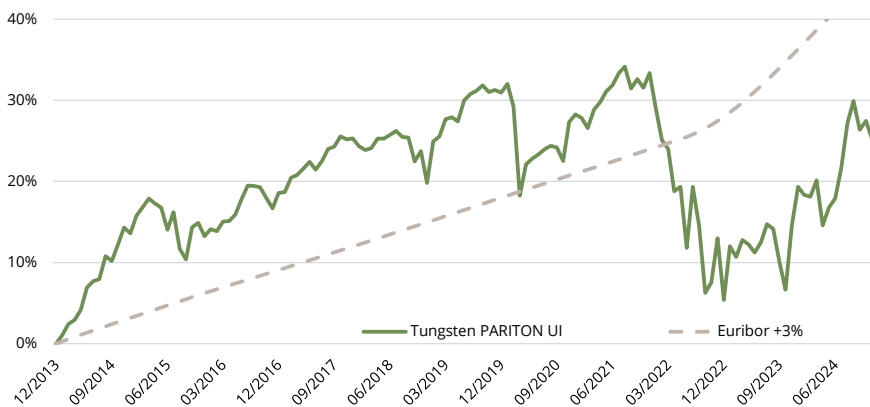

Monthly Comment

MAGA MEGA GAGA – January has lived up to its name. The current situation on the markets could indeed have been prompted by Janus. Many things will begin with the new US president and many will come to an abrupt end. Nevertheless, the speed and extent of his orders in a flash exceeded many expectations. On the day of his inauguration, however, “Deepseek” also reached the Western world. Perhaps the beginning of the end of the previous AI narrative. For market leader Nvidia, the news from China triggered the biggest one day loss in market value of a company ever. In general, China seems to be dominating in terms of innovation again, be it in technologies for climate protection, mobility or AI. The financial markets alone are pricing in deflation and stagnation. And Europe now seems to be lagging behind in all of these areas. However, the stock markets are celebrating the Eurostoxx. Even if things are clear, they always have two sides, like Janus medal.

Fund description

The Tungsten PARITON UI strategy aims to achieve a stable absolute return by combining several different asset classes in a multi asset portfolio.

The Tungsten PARITON UI fund considers only those assets that deliver an attractive risk/return ratio. To avoid a one-sided allocation, weights to these assets are assigned using a special risk balancing method. The employment of such risk balancing promises high risk-adjusted returns (Sharpe ratios) as the aggregate portfolio risk is managed very effectively. Due to the low risk nature of certain asset classes the fund may employ leverage in order to achieve a relatively constant level of volatility. The expected return of the strategy is 3%-6% p.a. above Euribor (1m).
