

Tungsten PARITON UI

Monthly Comment

HALF TIME – H1 is over and especially in the USA it on first sight as if the flood lifted all boats. S&P500 up 6,2%, Corporates +4,5% and even long term Government Bonds +2,8%. But the US Dollar started with one of its worst half year performances ever. The Greenback almost lost 14% against the EUR in H1, which makes US equity investments a loss of -7% for European Investors. To put that into perspective: The DAX won 36% translated in USD. That's a difference. One could say, markets are doing what Trump wants them to do: oil down, bond yields down, equities up, dollar down, bitcoin up. So it might makes sense to be aligned. As the FX risk is usually less than half of the equity risk and more or less uncorrelated, European investors tend not to hedge most of their US equity exposure, moreover they are usually overallocated to US assets when they are benchmarked MSCI World indices. So, it's a difficult time for many of our Multi Asset Fund Peers, which gives us some room to stabilize our strong outperformance versus our peer group.

1) The inception date of the institutional share class is 02 June 2014. The performance from 18 December 2013 until 02 June 2014 is the performance of the seeder share class adjusting the fee structure to reflect the differing costs of the institutional share class versus the seeder share class. The performance since 02 June 2014 is the live performance of the institutional share class. 2) Risk-free rate: Euribor (3m).

Fund description

The Tungsten PARITON UI strategy aims to achieve a stable absolute return by combining several different asset classes in a multi asset portfolio.

The Tungsten PARITON UI fund considers only those assets that deliver an attractive risk/return ratio. To avoid a one-sided allocation, weights to these assets are assigned using a special risk balancing method. The employment of such risk balancing promises high risk-adjusted returns (Sharpe ratios) as the aggregate portfolio risk is managed very effectively. Due to the low risk nature of certain asset classes the fund may employ leverage in order to achieve a relatively constant level of volatility. The expected return of the strategy is 3%-6% p.a. above Euribor (1m).
