

Tungsten PARITON UI

Monthly Comment

THE DEBASEMENT TRADE – Investors who worried about geopolitics, dysfunctional governments, widening budget deficits and fading credit quality, the future of the dollar and other major currencies, are looking to shield themselves from potential fallout. Their reaction function has a new name at Wall St: The debasement trade: Buy Gold, buy Bitcoin, and all things Tech Stocks at every little bad news stress test. Anything called real asset and which is not denominated in so called Fiat currency is on the buying list. And it's propelling precious metals and equity markets into lofty sky's and in new unseen valuation territories. While we see first cracks in corporate credit quality and some worrying bankruptcies (e.g. First Brands), the holy AI spectrum looks due to the huge financing needs more and more like a space, where important clients become also your strategic owners and long-term lenders. With each passing day, the AI conglomerate space mirrors the home mortgage securitization at the peak of the housing bubble with its overlapping series of capital conveyor belts. This will not bode well, but rest assured, we are prepared for the worst.

Fund description

The Tungsten PARITON UI strategy aims to achieve a stable absolute return by combining several different asset classes in a multi asset portfolio.

The Tungsten PARITON UI fund considers only those assets that deliver an attractive risk/return ratio. To avoid a one-sided allocation, weights to these assets are assigned using a special risk balancing method. The employment of such risk balancing promises high risk-adjusted returns (Sharpe ratios) as the aggregate portfolio risk is managed very effectively. Due to the low risk nature of certain asset classes the fund may employ leverage in order to achieve a relatively constant level of volatility. The expected return of the strategy is 3%-6% p.a. above Euribor (1m).
