

Tungsten TRYCON AI Global Markets

Monthly Comment

In September, global equity markets – most strongly outside Europe – continued their upward trend. The strategy benefited from this development through long positions, especially in the U.S. indices S&P 500 and NASDAQ 100, as well as in the KOSPI and the Nikkei 225. Trading in European indices, by contrast, incurred losses, particularly in the DAX 40 and, on the short side, in the IBEX 35. The mildly negative result in government bonds stemmed from smaller individual contributions and was mainly driven by losses in 10-year Italian and U.S. futures. In the money markets, declining 3-month USD interest rates at the beginning of the month weighed on performance. In currencies, long positions in the GBP were the main detractor, as the pound depreciated against the USD in mid-September. Additional losses resulted from two weak periods in the CAD during the reporting month. Trading in volatility indices, on the other hand, generated moderate gains on the short side.

Fund description

The fund's objective is to provide absolute returns with a moderate risk profile and low correlation to equity markets and other investments. The underlying trading models are based on Artificial Intelligence.

The Tungsten TRYCON AI Global Markets pursues a systematic multi-asset long/short strategy. Since September 2013, it uses quantitative models based on Artificial Intelligence to identify trading opportunities in the financial markets. Periodic re-learning leads to regular updates of the models. The investment universe comprises some 60 global equity, bond, interest rate and currency markets. In these markets, the fund can take both long and short positions using regulated, liquid and exchange-traded financial instruments. The portfolio is dynamically adjusted to changing market conditions in accordance with a strict risk management. The strategy is characterized by low correlation with traditional investments.

Performance contribution by sector

The sector performance attribution is intended to be indicative and to give an estimate of winning and losing components of the derivative positions in the fund. The results do not include fees/expenses or contributions from the cash/bond portfolio and do not add up to the aggregate fund performance.

Correlation (monthly data)

Key markets

Top 3 markets

- 1) E-Mini Nasdaq 100 Index
- 2) KOSPI 200 Index
- 3) Nikkei 225 Index

Bottom 3 markets

- 1) GBP / USD
- 2) DAX40 Index
- 3) CAD / USD

(Key futures markets by contribution to performance)

Risk allocation by sector per month end

Risk allocation is based on a proprietary measure. The information is intended to give an indication of the portfolio's allocation. A large level of cash and short-term bonds is inherent to the strategy, the average margin allocation is 5%-10%.
